

Diseases of the Lungs from Mechanical Causes; And Inquiries Into the Condition of the Artisans Exposed to the Inhalation of Dust

By George Calvert Holland

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1843 Excerpt: .revealed the secret of his recovery thirteen years ago. On opening the chest, extensive adhesions were found between the upper half of the right lung and the pleura costalis. The lungs did not collapse on opening the chest, and presented a peculiar appearance. Externally, as well as throughout the whole substance of them, numerous small black gritty bodies were observed, about the size of currants; as well as others, three, four, and five times as large, formed of the same material, and which strongly resisted the edge of the scalpel. In the right lung an immense cavity was discovered, occupying nearly one-third of it. An idea of its capacity may be formed from the fact, that the gentleman, whose case it was,¹ after laying it partly open, introduced his fist into it, and even then there was room for an additional body almost one-third the size,...
