

The Bulletin of the Geographical Society of Philadelphia Volume 17-18

Filesize: 8.78 MB

Reviews

The publication is great and fantastic. It is probably the most remarkable book i actually have read through. Its been printed in an exceedingly easy way and it is merely right after i finished reading through this publication where in fact altered me, modify the way i think.
(Tomas Witting)

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 100 pages. Dimensions: 9.7in. x 7.4in. x 0.2in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1920 edition. Excerpt: . . . tons of sulphur are lost and wasted annually by turning these fumes loose over the land, much to the detriment of vegetation. In phosphates the south has almost a natural monopoly. Late statistics show Florida, South Carolina and Tennessee producing together over 2, 700, 000 tons, while all other states of the union produced but 5, 000 tons in the year. This is not all the advantage accruing to the south in the phosphate industry. The native rock supply comes from the same region that is rich in pyrite. Pyrite is roasted to make sulphuric acid, and phosphate rock can only be made available for fertilizer by treatment with this acid. Coal to roast the pyrite, pyrite to be roasted and phosphate to be treated all are often found in close proximity; and the poorer well-worn soils of Virginia and southward demanding phosphate fertilizer, constitute a rare combination for the building up of a large industry. We have been so thriftless in the past as to send our pyrite to England to be made into acid, and our phosphate rock to be treated; and then have generously purchased the fertilizers from the English manufacturers, but we are learning. Alabama produces one half of all graphite mined in the United States and has great reserves. At present this product is mostly manufactured in the north. Georgia produces one half the ochers and mineral paint pigments found in the country. The south undisturbed by glaciers, has...
