

The Determination of Cotton and Linen: By Physical, Chemical and Microscopic Methods (Classic Reprint)

By Alois Herzog

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from The Determination of Cotton and Linen: By Physical, Chemical and Microscopic Methods This pamphlet, a translation of Professor Herzog s Die Unterscheidung von Baumwolle und Leinen, is offered as a useful handbook for persons concerned with textile manufacture, instruction, and especially textile purchase and use. Textiles have become a subject of importance to the purchaser since household manufacture has passed by with its intimate acquaintance on the part of maker and user with the characteristics and values of different fibres and fabrics, and in its stead has come the situation of purchaser on one side the counter, and sales-person on the other, both equally ignorant of textile values, often of textile identity. But sales-people on their part are trying to increase their knowledge: the instruction in salesmanship which has been organized in many places gives textiles its proper place in the curriculum. Schools of household arts and college departments of home economics have for several years recognized the necessity of textile study to educate the consumer. But there has been a dearth of scientific material...
