Excerpt: . . . yellow and blue were much more regular than those with spectral red and green. In our work, the results with the Urroth and Urgriin showed as little variability as those with blue and yellow. For a more complete statement of the case see, 1010. of Plzil0s. , Psyclml. and Sci. blethods, Vol. IV. , 1909, pp. 398-403 It is to be noted, moreover, that in so far as our results do not deal specifically with the determination of limits, but rather with the relative saturation of the stimuli and after-images and with the quality of the same, they are, in general, so pronounced as to be valid regardless of minor changes in illumination. than red, yellow or green, and green more stable than the two remaining colors. The results with the Urfarben seem to show the same relative stability of these several colors, in...
